Spdf · Professional Desktop PDF Suite

High-Performance PDF Reader, Editor, and Document Management

Welcome to Spdf! A high-performance, modern PDF reader, editor, and organizer natively built in Python using PySide6 (Qt6) and PyMuPDF.

Key Features implemented in Spdf:

* Modern Obsidian Dark Theme (#121212 / #1E1E1E) with Gold & Crimson accents
* High-DPI QGraphicsView & QGraphicsScene canvas with smooth drop shadows
* Interactive Page Thumbnails with drag-to-reorder and right-click context menu
* Bookmarks (Table of Contents) tree navigation
* Fast document text search with snippet previews and yellow glow highlights
* Commenting: Highlights, Underlines, Strikethroughs, Freehand Pen, Sticky Notes
* Editing: Draggable text overlays, Rubber stamps (Approved, Draft), Redactions
* Organizing: Merge multiple PDFs, Split by range/burst, Extract, Rotate, Delete
* Security: Digital signature drawing pad modal and AES-256 document encryption
* Exporting: PDF to PNG/JPG/TIFF (72, 150, 300 DPI) and full text extraction

Annotation & Editing Playground

This page is designed for testing annotation tools.

1. Test Highlight Tool:
Select the Highlight tool from the top ribbon or right Comments panel, and drag over any sentence.

2. Test Freehand Pen Tool:
Draw circles, underlines, or handwriting notes smoothly with customizable thickness and colors.

3. Test Redaction Tool:
Mark any sensitive block on this page for redaction. Notice the dashed crimson outline and [REDACTED] label. Click 'Apply Redactions Permanently' to sanitize the text permanently.

4. Test Digital Signature Pad:
Open the Protect & Sign panel, click 'Draw Digital Signature', sign in the modal pad, and place it directly onto the document canvas!

5. Test Save & Bake:
Click File -> Save (Ctrl+S). All your live annotations are permanently encoded into the PDF file format!
